

Richmond, CA Renewable Fuels Project

300 Firewater Line

Request for Proposal 2024-0024

REVISION A

9/20/2024

1. Scope of Work

This scope of work includes the excavation, backfill, and compaction for firewater line from the property line to the hydrant. The installed firewater line will be approximately 345 linear feet of 12" HDPE piping. The scope will include (1) 6" fire hydrant, (1) 12" gate valve, (1) 6" gate valve, and (1) 16" carbon steel pipe sleeve under the new rail spur.

There is no electrical scope.
